DETAILED ACTION

STATUS

Claims 2-58 are pending.

Response to Arguments

The Applicant's arguments filed on February 11, 2006 have been fully considered. The amended claims are rejected in view of the newly discovered reference Wolfe (US Patent 4,796,220).see following rejection

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 42 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hartrick et al. (US Patent 5,532,920) in view of Wolfe (US Patent 4,796,220)

As per claim 42,
Hartrick et al. ('920) discloses an apparatus that provides electronic books to a subscriber, comprising;
a processor that communicates with an electronic book ordering site, the processor supplying an electronic book selection and a processor identification; (Column 12, lines 20-33)
a transmitter, coupled to the processor, that sends the electronic book selection and the processor identification to the ordering site (Figure 8A);
a receiver module that receives a data signal and a local authorization code, wherein the data signal comprises an encrypted electronic book selection and wherein the local authorization code allows the data signal to be decrypted for viewing;(Figure 9A)
a memory coupled to the receiver module, the memory storing the received authorization code until needed for decrypting the data signal. (Column 6, lines 61-67)
Hartrick et al. ('920) does not explicitly disclose "wherein the local authorization code includes an expiration, wherein upon occurrence of the expiration, the selected electronic book cannot be decrypted using the local authorization code" Wolfe ('220) ('515) discloses "wherein the local authorization code includes an expiration, wherein upon occurrence of the expiration, the selected electronic book cannot be decrypted using the local authorization code"

Art Unit: 3621

“(Column 7, lines 24-56) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Hartrick et al method with the Wolfe method in order to securely distribute software

Allowable Subject Matter

Claims 2-41 and 43-58 are allowable over the prior art record.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry of a general nature or relating to the status of this application or concerning this communication or earlier communications from the examiner should be directed to John Winter whose telephone number is (571) 272-6713.
